Today we will learn:

1. How to create TAGS
2. How to use tags during Test Execution
3. How to use tags in Reports
4. How to create Dynamic Tags
5. How to set TAGS from command line

Sanity, Smoke, Regression, Critical

Tags are used to classify/categorize test cases

Useful TIP
command line option : --settag

Step 1 : Goto cmd and cd to your robot framework project

Step 2 : syntax
          robot -t TestName --settag=TagName TestSuite.txt
