What is Gecko Driver – https://www.youtube.com/watch?v=3–Jq9GrNVVc

Today we will learn:
1. How to add browser exe files
2. How to run test on different browsers

Step 1 : Open RIDE

Step 2 : Create a step to open browser in Firefox
            This will fail if you do not have firefox driver exe
(gecko driver exe) in Python folder

Step 3 : Get browser Driver exe file. Goto SeleniumHQ.org and
Download browseR driver exe file

Step 4 : Keep the driver exe file in \Python27\Scripts folder
            Note : This folder should be addded in environment path
variable
(You can use any other location inside python folder as well)

Step 5 : Open RIDE – Goto Test Case – In the test step open browser
give the browser name

BROWSER NAME TO USE
Firefox   firefox, ff
Google Chrome   googlechrome, chrome, gc
Internet Explorer   internetexplorer, ie
Edge   edge

Step 6 : Run and Validate
