Today we will learn:

1. How to run one specific Test from cmd
2. How to run few selected Tests from cmd
3. How to run tests with TAGS from cmd
4. How to run all Tests in a Suite from cmd
5. How to send RESULTS to a specific folder

Useful TIPS

_____

Step 1 : Open cmd and goto the location of project

Step 2 : Run single test
         robot -t TestName SuiteFile

Step 3 : Run multiple tests
         robot -t Test1 -t Test2 SuiteFile

Step 4 : Run Tests with TAGS
         Include TAGS
         robot --include tagName SuiteFile
         robot -i tagName SuiteFile
         robot -i tagName -i tagName SuiteFile
         robot -i S* SuiteFile

         Exclude TAGS
         robot --exclude tagName SuiteFile
         robot -e tagName SuiteFile
         robot -e tagName -e tagName SuiteFile
         robot -e S* SuiteFile

Step 5 : Run all tests in a test suite
         robot suiteFile

Step 6 : Send results to a folder
         robot -t Test5 -d Results TestSuite1.txt

Useful TIPS
Using regular expressions

how to make tags critical / non-critical
e.g.
robot -i S* --critical Smoke TestSuite1.txt
robot -i S* -c Smoke TestSuite1.txt
robot -i S* --noncritical Smoke TestSuite1.txt
robot -i S* -n Smoke TestSuite1.txt
